Dear Parents,

Welcome to our childcare/preschool program at ANGEL LEARNING CENTER. Our center is here to provide excellent care, with loving and educated staff.

Our child development facility is programed for ages six weeks through three years old. We plan on help the children with their emotional, social, physical, mental, and educational development. We believe that successes starts with close cooperation between our excellent staff and parents. Out program doesn't end with age three, we continue our development with our before and after school care, which mainly concentrates on education. Our belief here at ANGEL LEARNING CENTER is that education makes the difference in a person future.

This handbook has been prepared in order that you may become familiar with our policies, and better understand the program.

Yours truly,

ANGEL LEARNING CENTER TEAM

HOURS AND DAYS OF OPERATION

Our center opens at 5am and continues to 8pm. Depending on which program your child has enrolled in; they will be assigned a time frame and a room. We are open 6 days a week. The center is not closed on any government holidays except Christmas and New Years. Our program does however follow government holidays and will not be held during holidays, but in their place we have another program, which is oriented with another goal in mind.

THE CENTER

We wanted to revolutionize childcare, so we developed a program that will do just that. We guide children of all ages to become confident independent learners, with the help of our educated teachers and with our Angel curriculum. Unlike convectional childcare center where children stay in one room, we have different rooms to execute different skills. Our unique specialized learning classrooms are developed to help your child thrive with different skill sets. Our staff requirements go beyond most childcare centers. You child's safety and you peace of mind are our number one priority. We offer real time online viewing. Our secure check in and check out systems ensures that your child is only released to the designated guardian. We also use biometric finger print scanners to ensure that our security is unbeatable.

READING REEF

Children discover a love for reading. Scholastic has provided a wide range of different books, ranging from fiction to biographies. Reading short stories is a form of entertainment and helps the child to develop a wider imagination.

IMAGINATION ISLAND

This is our version of an indoor playground. Children can play dress they can become whatever their imagination. They can play with play money checking out at our food mart.

MEDIA ROOM

With our highly technological room, children can learn communication. Reporting news in different languages. They can record themselves and recording can be found at the lobby upon request. With our different technological devices we have a vast verity of different subjects we can review. Solar system, earth, history, special events, and current issues are only some of the different subjects your child will be exposed to.

SCIENCE CENTER

With our different science equipment's we are capable of different experiments. Our center also has an outdoor ecosystem, which helps the children learn about different living and non-living organisms.

CULINARY ARTS

Children will discover a love for cooking while enforcing academics by reading recipes, measuring ingredients. Children will have fun creating inspired health balanced snacks.

ECOSYSTEM

Children have the ability to learn about the plants and living organisms. Our diverse ecosystem has many different non-living organisms as well. This helps children understand the general ideas of everyday life.

AFTERSCHOOL JUNGLE

With the help of technology we are able to say that we have the most up to date technology to help your child with their schoolwork. We have afterschool tutors who work with your child in completing their homework, so when they are ready to be picked up they can spend time with their hardworking parents. There is also multiple entertainment options for your children when they are done with their homework and studying for any future tests and quizzes.

CLASSROOMS

Our teachers use interactive tablets to enhance your child's academic process, in reading, math, science, and critical thinking. The tablets have abilities to send reports to the teachers to show progress of each student.

THE PROGRAM

INFANTS PROGRAM

Our infant care is safe, secure, and convenient for busy working parents. We believe that infant care in a group setting where infants have face time with other infants creates a positive impact on that child's physical, mental, and emotional development. Our program features an interactive curriculum to specifically target cognitive development. Our fun and language rich environment allows teachers to interact with infants with baby sign language, singing, cuddling and reading.

TODDLERS PROGRAM

Our toddlers are optimizing motor development by different movement; also with the help of our enrichment rooms, have the resources and technology. We want to develop your child's muscle control, balance and coordination, while encouraging a second language and creative expressions. At this age children have started their early brain development stage, thus making it very crucial in what they learn in this time period. You can review all their work with their weekly reports. With the weekly report you can track their progress, and see how they are developing throughout our enhanced program.

PRESCHOOL

Our preschool program not only follows the Georgia Standards but also takes them to a higher standard of education. Our preschool program is not set in stone, because we believe that every child is different and have different needs. What we do set in stone is that no matter how each child is different we believe that all children have a basic capacity for versatile education. With our wide language selection children will be exposed to three different languages. The ability to speak different languages allows the child to widen their perspective and allows them to diversify themselves. Language is not the only way children in our preschool program express themselves, we use music, art, creative creations, cooking to help children express their emotion.

Pre-K

Georgia Department of Early Education mandates and regulates the Pre-K program. The state has its own rules and procedures on how the program should be executed, but gives each program provider leeway, for making their program different from others. Keeping education in mind, our Pre-K program is designed to help children grow academically, emotional, as well as physically. Academically, our program will allow children to be exposed to material that isn't traditionally available to other providers. With our standards of education our Pre-K program will allow children to be in reach of different resources, which aren't available to them currently.

AFTER SCHOOL AND BEFORE CARE

Our before and afterschool program is designed for the working parent who want their child in a safe environment but also a fun educating one. Our before school program is created for the students whose parents have to be at work before students have to be at school. The program allows parents to drop their child off at our center on their way to work, knowing that their child will have a hearty breakfast and be dropped off at school on time, while being at a safe and secure center. In the afternoon we pick up the children, give them a prepared snack; they also have the opportunity to make their own snack.

ADDITIONAL AMENITIES AT NO COST

MEDICAL CARE

Our center employs a full time nurse to preform all medical needs. Our nurse is able to administer all medication with signed certification of compliance. We also partner with many local and national pediatrics firms to ensure your child's and our student's the best possible medical care. We coordinate with your primary physician to rely all relevant information to them.

NUTRITIONAL GUIDELINES

Our team of highly experienced chefs fully prepares and serves the best dishes for our students. With extensive research, we have come up with the solution that we are what we eat. A student, who has a balanced diet, is shown to have a healthier educational experience. Our team of chefs are not only following a higher standard of nutrients but exceeding them.

EYES IN THE SKY

We have partnered with WatchMeGrow, they provide the highest quality of surveillance cameras for childcare centers. This system allows parents anywhere in the world to login and see what their children are up to. The system not only allows parents to keep an eye on their children on a day-to-day bases but also allows a clear-cut solution for accountability. We pride ourselves on transparence; this system is the biggest asset.

PARENT TEACHER COMMUNICATION

Parents and teachers are able to communicate through our website platform. We understand that the ability to know what your child is doing at all times is very important, we make it as easy as signing in and asking the question directly to the teacher. The platform allows for picture transfers, so you can be updated as frequently as you want on the work your child is performing.

BOARD OF ADVISORS

We have a team of advisors who share a very common idea; the idea that childcare in the southeast needs to change. The primary task for the advisors is to bring changes to our programs. The program as a whole we believe is the biggest jump in childcare education that southeast has ever seen. We encourage you as the parents to meet with our advisors and leave comments, concerns and make your voice heard.
